

## Cylinder Maintenance Sheet

Master Keyed door cylinders have on average between 24-48 moving components on the key side. Therefore, it is very important that the cylinder is maintained correctly and on a regular basis to ensure its reliability and life expectancy.

To maintain your cylinders, we recommend you use a SILICONE or TEFLON based lubricant regularly to be applied at the following intervals.

Coastal/Corrosive environment apply **MONTHLY**

75-100 operations daily apply **MONTHLY**

50-75 operations daily apply **QUARTERLY**

Less than 50 operations daily apply **½ YEARLY**

**UNDER NO CIRCUMSTANCES USE WD40\* GREASE OR OIL.**

Appropriate lubricants and cleaners are available via the architectural ironmonger that supplied your suite.

If in any doubt please do not hesitate to email [sales@masterkeysystems.co.uk](mailto:sales@masterkeysystems.co.uk) quoting your Master Key reference number.

**WD40 do manufacture a SILICONE spray which can be used.**
