

Lockmakers Since 1780

bikelok[®]

Toughness guaranteed.

Introducing Squire

As more and more of us take up cycling, it's ever more important to choose the right type of security and deter the opportunistic thief.

That's why Squire is proud to offer the very best in cycle security with our specialist Bikelok range, our most convenient and easy to use cycle locks yet.

Squire has been making cycle locks since the 1960s, and we've drawn on extensive research and development to create our widest choice of Sold Secure rated security.

From cable locks, D-locks, and padlock and chain sets, to recodable combination locks, our specialist locks are designed for weekend leisure, families, commuters, sports bike racers and enthusiasts.

Squire is a family business that began in 1780. Its great British history has been carried down through eight generations.

And today, Squire is recognised for some of the most technologically advanced products in lock making.

Our range-topping Snaplok is lighter in weight than any other Sold Secure Silver rated D-lock - it was the UK's first combination cycle lock to achieve this rating.

We're proud of our craft and stand firmly behind our reputation for long-lasting toughness which is guaranteed.

It's why we offer a personal 'no-quibble' 10-year guarantee on every product - you don't even need a receipt.

We've updated our catalogue to include all the latest advancements to our products.

If you'd like to know more, please contact us, we're happy to help.

Lockmakers Since 1780

bikelok[®]

We've found a new consumer friendly approach to product navigation - we reduced the range and split it into three distinct sub-brands: Sport BikeLok, Urban BikeLok and Leisure BikeLok.

sportbikelok[®]

Sport BikeLok is a small range of our most specialist locks for the real enthusiast. Our range topping SnapLok is a lock that's both lightweight and secure. The perfect match for a lightweight sports bike.

urbanbikelok[®]

Urban BikeLok is aimed at the commuter. The range includes a wide selection of tough utility D-locks and cable locks.

leisurebikelok[®]

Leisure BikeLok is targeted mainly at family and kids bikes. It includes larger cable locks to secure multiple bikes at once, as well as a great colour choice.

New Packaging

Our new packaging is designed to help the customer choose their cycle lock quickly, and easily identify key features. Customers are guided by the colour coded usage categories. And they can see product strength ratings (1 = low, 10 = high), and special features and accreditations at a glance.

Sold Secure attack testing

Many of the products showcased in our brochure have achieved Sold Secure status, most achieving silver or gold. This is a testament to Squire's rigorous test procedures. Importantly, customers can be assured that all locks are tested to the most stringent levels, via Squire's in-house test procedures and external accreditation bodies such as Sold Secure.

Crimestoppers

Some of the Squire cycle lock range are supported by Crimestoppers, the well known crime fighting charity. The Crimestoppers brand is well recognised and gives Squire the added peace of mind that their chosen bike lock is approved by an independent body.

Secured by Design

Secured by design is a project initiated by the British Police force now run by the Mayor's Office for Policing and Crime (MOPAC) on behalf of the UK police services. Established in 1999 it was established as a not-for-profit organisation SBD works with industry and test houses to create high level security standards. Many Squire cycle locks are approved by SBD.

Combination cycle locks Sold Secure approved

Squire understands that customers want new and better solutions to cycle security problems. The Squire combination product range offers users a full choice of sophisticated 'keyless' solutions to match all security needs, from high security Sold Secure cycle locks with TORQ DRIV™ technology through to economical combi cables.

Unique in design, our combination locks are manufactured to the highest standards for quality performance. Easy to use, they are fully recodable and many can be coded alike so one code opens several locks.

Many of our locks are patented and have achieved Sold Secure status, with individual design features to improve performance and security.

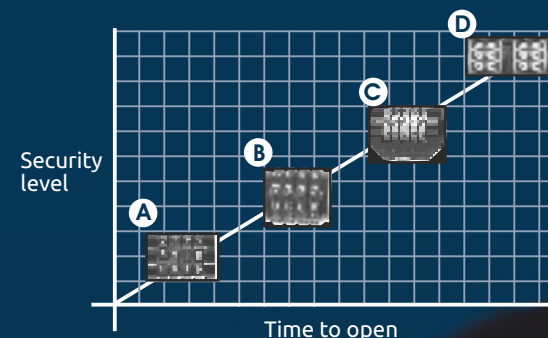

Why choose combination?

When keys are lost or stolen it's a real problem. That's why key-operated security products are increasingly unpopular with many users. The only way to regain security quickly is by buying a new lock, which is expensive and time consuming. With our complete range of recodable combination padlocks and locks, there is no need for keys. Codes can be changed quickly, easily and at low cost, so the system always stays secure.

TORQ DRIV™

What makes our bike locks unique is Squire's patented TORQ DRIV™ technology – a recoding mechanism developed exclusively by Squire's in-house designers to ensure the lock cannot be accidentally recoded.

Combination Locks

SNAPLOK™ 260 & 210

Hi Security, light weight Karabina lock

The SNAPLOK 'Karabina' Lock, is lighter in weight than a typical 'D' Lock, though without any reduction in strength.

It achieves Sold Secure Silver, has 5 wheels and offers 100,000 possible combinations.

It is fully recodable and is a Patented Squire product.

Made in Britain

HAMMERHEAD™ COMBI

Hi Security 'D' Lock - One Million combinations

The HAMMERHEAD COMBI achieves Sold Secure Silver. It has six combination wheels giving over One Million possible combinations.

It comes in two shackle lengths 230mm and 260mm and uses Squire's patented TORQ DRIV Technology.

MAKO™ COMBI

Range of cables locks

A range of cable locks.

Available in various two diameters, 18mm and 25mm. The armoured version achieves Sold Secure Silver and non armoured version achieves Sold Secure Bronze.

The 18mm cables are available as 1800mm length and 900mm. The 25mm diameter locks are 1200mm long. The MAKO range sit within the Urban range and the Leisure range dependent upon strength.

MAKO™ COMBI

Range of integrated lock and chains

A range integrated lock and chains.

They are available with two different chain diameters, 8mm and 6mm. They come in 900mm and 600mm lengths.

The 6mm chains achieve Sold Secure Bronze. The 8mm chains achieve Sold Secure silver.

The MAKO range sit within the Urban range and the Leisure range dependent upon strength.

sportbikelok[®]

Sport BikeLok is a small range of our most specialist locks for the real enthusiast. Our range topping SnapLok™ is a lock that's both lightweight and secure. The perfect match for a lightweight sports bike.

Economical cable locks, combination and key

For cyclists looking for a lower cost cable, Squire offers a range of cable locks in both key and combi versions.

The Zenith Range has the highest ratings and the Zenith Combis feature an LED light built into the lock, that is useful in dark situations.

The combination locks on this page all feature 4 wheels and 10,000 possible combinations and are fully recodable.

All of the locks (with the exception of the 112, 12C, 10C, and 8C) come with the universal MAKO carrying bracket.

Squire's 10 year guarantee on all locks as standard.

Merchandising header banners

Squire give a great deal of consideration to your customers buying experience, making it simple to choose the right type of security product for the right situation. Squire are also very aware of the retailers needs, taking account of valuable store space and understanding how important high impact merchandisers, point of sale and packaging are in a competitive retail market.

Our Point of Sales designers are constantly working on exciting new concepts and Squire expect to be launching further merchandising solutions over the coming year. For retailers stocking a significant range of Squire products we also offer bespoke merchandising solutions tailored to a specific retail environment. If you would like to find out about our merchandising or POS opportunities, or if you would like to enquire about becoming a SQUIRE stockist call us on 01902 308050 or (International: + 44 1902 308050).
